

BIONOTE

Maria Irene S. Amatorio, is a Senior Science Research Specialist and the Head of the DOST-Advanced Science and Technology Institute's Technology Licensing Office.

She obtained her Bachelor of Science degree in Development Communication, with double major in Science Communication and Community broadcasting, from the University of the Philippines, Los Baños, and in her senior year in law school at the Polytechnic University of the Philippines.

As a scholar of the Korea International Cooperation Agency (KOICA), she obtained a specialized course on Intellectual Property Rights for ASEAN countries in South Korea and she was also trained through the USAID- STRIDE, for Knowledge Technology Transfer Officers. She also finished master courses in Intellectual Property Enforcement, and IP legal -- IP

management from the Intellectual Property Office of the Philippines.

One of her major achievements is the expansion of the DOST-ASTI's international linkages when she served as the agency's coordinator for a European Union funded projects under the FP7 program. She also served as the assistant of the National Contact Point for ICT in the Philippines, and actively participated in activities led by the Ideal-IST network across Europe.

Her successful initiatives in both international and local collaborations of the DOST-ASTI, and her recent recognition as a certified Innovation Management Associate by the Global Innovation Management Institute, paved way to several strategic technology transfer initiatives of the agency, including the selection and recommendation of innovative ICT solutions that can be implemented and/or used by the Local Government Units in its SMARTER city or community programs.
